

Curriculum Vitae

Murtuza Salman Mohammed

Calgary, AB, Canada

Mobile: +1 437 663-1488

Email: murtuzasalman88@gmail.com

Career Summary

Senior software engineer with over **4+ years of experience in full-stack software development and AI engineering**

Proven track record in leading end-to-end project delivery and driving process improvements by implementing scalable, reliable solutions and optimizing performance. Skilled in Java, Spring Boot, and React, known for building enterprise-grade applications with a focus on maintainability and high availability

Professional Objective

Pursuing a responsible and challenging position in a growth-oriented organization where my qualification, knowledge, extensive technical experience, analytic and professional/personal skills can be better harnessed, shared and enriched.

Core Competencies

Programming Languages: **Java, Python, C#, JavaScript**

Frameworks & Libraries: **Spring Boot, React, Node.js, Express.js, React.js, TensorFlow, Scikit-learn, Keras, Apache Camel**

Tools & Technologies: **AWS, Docker, Amazon RDS (Relational Database Service), Azure Cosmos DB, MySQL, SQL Server, PostgreSQL, Hibernate, JPA, RESTful APIs, MongoDB, Git, Jira, IntelliJ, Eclipse**

Development Practices: **Agile, CI/CD, TDD, Version Control (Git)**

Machine Learning: **Regression, Classification, Neural Networks, Deep Learning, NLP, Reinforcement Learning**

Testing: **Proficient in unit and integration testing using JUnit and other frameworks**

Personal Skills

Innovative, Pro-Active, Systematic Problem-Solving, Critical & Analytical Thinking, Ambitious & Goal-oriented, Handling Stressful Situations, Collaborative Teamwork

Personal Assets

Determined, Highly self-motivated, Capable of meeting objectives, Ambitious, Empathetic, Hardworking & Tolerant

Work Experience

Senior Full Stack & AI Engineer

(April 2025 – present)

Whiz Solutions Inc. – Calgary, AB, Canada

- **Architected and developed scalable microservices and RESTful APIs** using **Java, Spring Boot, Hibernate** enabling reliable integration across distributed enterprise systems.
- Designed cloud-native applications and services using **Docker, AWS (EC2, RDS, SageMaker), Azure Cosmos DB, and CI/CD pipelines**, ensuring scalable, highly available, and production-ready deployments.
- Engineered secure authentication and authorization solutions using **Spring Security, JWT and bcrypt**, implementing modern security practices for enterprise applications and APIs.
- Built and optimized AI/ML solutions using **Python, TensorFlow, Keras, PyTorch, and Scikit-learn**, developing models for sentiment analysis, computer vision, classification, and reinforcement learning.
- Developed and deployed production ML pipelines on **Amazon SageMaker**, leveraging traffic shifting, **automated rollback, and guardrails** to support reliable and fault-tolerant model deployments.
- Engineered a synthetic computer-vision data generation pipeline using **OpenCV** and **Albumentations**, producing 10,000+ annotated training images to improve object-detection model performance.
- Developed reinforcement learning solutions for autonomous systems using **AWS DeepRacer**, achieving **1st place among 20 teams** in an AI competition.
- Integrated relational and **NoSQL** data platforms including **PostgreSQL, MySQL, SQL Server, MongoDB, and Azure Cosmos DB**, applying **query optimization, indexing, partitioning, caching, and ORM techniques** to improve application performance.
- Implemented enterprise integration and asynchronous communication patterns using **Apache Camel**, improving interoperability, modularity, and scalability across distributed services.
- Automated CI/CD and software delivery workflows using **Azure DevOps, Jenkins, Git, Docker, and Agile/TDD practices**, contributing to a **30% reduction in deployment-related defects**.
- Optimized backend application performance through **query optimization, caching, lazy loading, and efficient JPA/Hibernate data access**, achieving up to **25% improvement in API response times**.
- **Collaborated** with software engineers, data scientists, QA, and cloud architects to deliver end-to-end solutions spanning Java backend development, API architecture, data engineering, cloud infrastructure, and AI/ML deployment.

Key Technologies:

Java, Spring Boot, Spring Security, Hibernate, JPA, REST APIs, Apache Camel, Python, TensorFlow, PyTorch, Keras, Scikit-learn, Machine Learning, Deep Learning, Reinforcement Learning, Computer Vision, AWS SageMaker, AWS EC2, AWS RDS, Azure Cosmos DB, Docker, PostgreSQL, MySQL, SQL Server, MongoDB, React, Git, Jenkins, Azure DevOps, CI/CD, TDD, Agile methods, OpenAPI Swagger

Full-stack Developer

(Dec 2021 - July 2023)

Pilog India Pvt Ltd, Hyderabad, India.

- Designed & developed Java-based applications for finance and petrochemical clients.
- **Migrated legacy code** from JDK 8 to JDK 17, **improving** performance by **40%**.
- Developed RESTful APIs using Spring Boot, integrating with **third-party systems** and securing calls with **JWT**.
- Led cross-functional collaboration to gather requirements, define project scope, and meet delivery timelines.
- Improved application response times by 30% through performance optimization.
- Established CI/CD pipelines with DevOps teams, streamlining build and deployment processes.
- Designed scalable database models and implemented data access layers using **Hibernate** and **JPA**.
- **Mentored** junior developers, conducted **code reviews**, & contributed to **Agile** adoption
- **Documented technical specifications, REST endpoints, and architecture diagrams**, ensuring maintainability and smooth handoffs across project teams.

Education Qualifications

Object-Oriented Software Development (Graduated)

Southern Alberta Institute of Technology, Calgary, AB, Canada.

Artificial Intelligence with Machine Learning (Graduated)

Humber College, Toronto, ON, Canada.

Bachelor of Engineering (B.E) Computer Science (Graduated)

Muffakham Jah College of Engineering and Technology, Hyd., India.
